

RIO18
21st World Congress
of Soil Science

21 WORLD CONGRESS OF SOIL SCIENCE
Sunday 12 – Friday 17 August 2018
Rio de Janeiro, Brazil

Rio de Janeiro August | 12 - 17

DIVISIONAL SIMPOSIUM – DIVISION 1

Monday (Aug, 13)		Room “Capri IV”	
C1.4.1		Soil systems and soil classification - their links and feedbacks	
		Convener: Monger, Curtis, National Soil Survey Center; USDA-Natural Resources Conservation Service, Lincoln, NE, US	
		Co-Convener: Ademir Fontana, Embrapa Soils, RJ, Brazil	
Schedule	ID	Title	Presenter
15:30 – 15:40	--	Opening	Conveners
15:40 – 15:55	2387	Brazilian Soil Classification System (SiBCS) reached 20 years - results and advances	Humberto Gonçalves dos Santos
15:55 – 16:10	853	Object of natural soil classification: Is it a system or an element of a system?	Aleksandra A. Nikiforova
16:10 – 16:25	1610	Development of an expert system for classification of Brazilian soil profiles	Luís de França da Silva Neto
16:25 – 16:40	2165	Are geographic information systems and remote sensing technologies enough tools for improving landuse planning? A case study of Arnaha VDC of Saptari District, Nepal	Keshav Raj Adhikari
16:40 – 16:55	1273	Modification of Paleustults at subgroup level: a case of tropical sandstone and siltstone-derived soils	Somchai Anusontpornperm
16:55 – 17:10	1879	Spodosols of Pantanal region: characterization, genesis and classification	Andressa Rosas de Menezes
17:10 – 17:25	2259	Visualizing soil landscapes by mining soil survey taxonomic data	Darrell G. Schulze
17:25 – 17:40	219	A Study of Soil Taxonomy of Artificial Soils Containing Artifacts Typical of China-Discussion on Soil Reconstruction and Soil Taxonomic Classification in Land Engineering	Kening Wu
17:40 – 17:55	1496	Preliminary thoughts about a new HAHT soil order for Soil Taxonomy	John M. Galbraith
17:55 - 18:00	--	Closing	Conveners
