1	An Overview of the Modeling of Electrokinetic Remediation	1
	<i>Maria Villen-Guzman, Maria del Mar Cerrillo-Gonzalez, Juan Manuel Paz-Garcia, and Jose Miguel Rodriguez-Maroto</i>	
1.1	Introduction	1
1.2	Reactive Transport	3
1.2.1	One-Dimensional Electromigration Model	3
1.2.2	One-Dimensional Electromigration and Electroosmosis Model	7
1.2.3	One-Dimensional Electrodialytic Model	9
1.2.4	One-Dimensional Electroremediation Model Using Nernst-Planck-Poisson	16
1.3	Chemical Equilibrium	18
1.4	Models for the Future	24
1.4.1	Combining Chemical Equilibrium and Chemical Reaction Kinetics	24
1.4.2	Multiscale Models	26
1.4.3	Two- and Three-Dimensional Models	29
1.4.4	Multiphysics Modeling	29
	Acknowledgments	30
	References	30
2	Basic Electrochemistry Tools in Environmental Applications	35
	<i>Chanchal Kumar Mitra and Majeti Narasimha Vara Prasad</i>	
2.1	Introduction	35
2.1.1	Electrochemical Half-Cells	37
2.1.2	Electrode Potential	38
2.1.3	Electrical Double Layer	40
2.1.4	Electrochemical Processes	41
2.1.4.1	Polarization (Overvoltage)	41
2.1.4.2	Slow Chemical Reactions	42

2.2	Basic Bioelectrochemistry and Applications	44
2.3	Industrial Electrochemistry and the Environment	44
2.3.1	Isolation and Purification of Important Metals	44
2.3.2	Production of Important Chemical Intermediates by Electrochemistry	45
2.4	Electrokinetic Phenomena	45
2.4.1	Electroosmosis in Bioremediation	46
2.5	Electrophoresis and Its Application in Bioremediation	47
2.6	Biosensors in Environmental Monitoring	48
2.6.1	What Are Biosensors?	48
2.6.2	Biosensors as Environmental Monitors	49
2.7	Electrochemical Systems as Energy Sources	52
2.8	Conclusions	55
	References	55
3	Combined Use of Remediation Technologies with Electrokinetics	61
	<i>Helena I. Gomes and Erika B. Bustos</i>	
3.1	Introduction	61
3.2	Biological Processes	62
3.2.1	Electrobioremediation	62
3.2.2	Electro-Phytoremediation	64
3.3	Permeable Reactive Barriers	67
3.4	Advanced Oxidation Processes	67
3.4.1	Electrokinetics-Enhanced In Situ Chemical Oxidation (EK-ISCO)	67
3.4.2	Electro-Fenton	70
3.5	<i>In Situ</i> Chemical Reduction (ISCR)	71
3.6	Challenges for Upscaling	71
3.7	Concluding Remarks	73
	References	73
4	The Electrokinetic Recovery of Tungsten and Removal of Arsenic from Mining Secondary Resources: The Case of the Panasqueira Mine	85
	<i>Joana Almeida, Paulina Faria, António Santos Silva, Eduardo P. Mateus, and Alexandra B. Ribeiro</i>	
4.1	Introduction	85
4.2	Tungsten Mining Resources: The Panasqueira Mine	86
4.2.1	The Development of the Industry	86
4.2.2	Ore Extraction Processes	88
4.2.3	Potential Risks	88
4.3	The Circular Economy of Tungsten Mining Waste	89
4.3.1	Panasqueira Old Slimes vs. Current Slimes	89
4.3.2	Tungsten Recovery	90
4.3.3	Building Material-Related Applications	92

4.4	Social, Economic, and Environmental Impacts	93
4.5	Final Remarks	94
	Acknowledgments	94
	References	95
5	Electrokinetic Remediation of Dredged Contaminated Sediments	99
	<i>Kristine B. Pedersen, Ahmed Benamar, Mohamed T. Ammami, Florence Portet-Koltalo, and Gunvor M. Kirkelund</i>	
5.1	Introduction	99
5.2	EKR Removal of Pollutants from Harbor Sediments	101
5.2.1	Pollutants and Removal Efficiencies	101
5.2.1.1	Metals	102
5.2.1.2	Organic Pollutants and Organometallic Pollutants	104
5.2.2	Influence of Experimental Settings and Sediment Properties on the Efficiency of EKR	105
5.2.2.1	Enhancement of EKR – Changes in Design	106
5.2.2.2	Enhancement of EKR – Chemical Agents and Surfactants	106
5.2.2.3	Sediment Characteristics	108
5.3	Case Studies of Enhancement Techniques	111
5.4	Evaluation of the Best Available EKR Practice	120
5.4.1	Energy Consumption	120
5.4.2	Environmental Impacts	122
5.5	Scaling Up EKR for Remediation of Polluted Harbor Sediments	123
5.5.1	Results and Comments	125
5.6	Future Perspectives	129
	References	131
6	Pharmaceutically Active Compounds in Wastewater Treatment Plants: Electrochemical Advanced Oxidation as Onsite Treatment	141
	<i>Ana Rita Ferreira, Paula Guedes, Eduardo P. Mateus, Alexandra B. Ribeiro, and Nazaré Couto</i>	
6.1	Introduction	141
6.1.1	Emerging Organic Contaminants	141
6.1.2	Occurrence and Fate of EOCs	141
6.1.2.1	EOCs in WWTPs	143
6.1.3	Water Challenges	144
6.1.4	Technologies for Wastewater Treatment – Electrochemical Process	146
6.2	Electrochemical Reactor for EOC Removal in WWTPs	148
6.2.1	Experimental Design	148
6.2.1.1	Analytical Methodology	148

- 6.2.2 Electrokinetic Reactor Operating in a Continuous Vertical Flow Mode 150
- 6.3 Conclusions 153
 - Acknowledgments 153
 - References 153

- 7 Rare Earth Elements: Overview, General Concepts, and Recovery Techniques, Including Electrodialytic Extraction 159**
Nazaré Couto, Ana Rita Ferreira, Vanda Lopes, Stephen Peters, Sibel Pamukcu, and Alexandra B. Ribeiro
- 7.1 Introduction 159
 - 7.1.1 Rare Earth Elements: Characterization, Applications, and Geo-Dependence 159
 - 7.1.2 REE Mining and Secondary Sources 162
 - 7.1.3 REE Extraction and Recovery from Secondary Resources 163
- 7.2 Case Study 164
- 7.3 Conclusions 166
 - Acknowledgments 167
 - References 167

- 8 Hydrocarbon-Contaminated Soil in Cold Climate Conditions: Electrokinetic-Bioremediation Technology as a Remediation Strategy 173**
Ana Rita Ferreira, Paula Guedes, Eduardo P. Mateus, Pernille Erland Jensen, Alexandra B. Ribeiro, and Nazaré Couto
- 8.1 Introduction 173
 - 8.1.1 Hydrocarbon Contamination 173
 - 8.1.2 Oil Spills in Arctic Environments 174
 - 8.1.3 Remediation of Petroleum-Contaminated Soil 175
 - 8.1.3.1 Electrokinetic Remediation (EKR) 176
- 8.2 Case Study 177
 - 8.2.1 Description of the Site 177
 - 8.2.2 Soil Sampling 178
 - 8.2.3 Electrokinetic Remediation (EKR) Experiments 178
 - 8.2.4 Analytical Procedures 179
 - 8.2.4.1 Soil Characterization 179
- 8.3 Determination of Metals and Phosphorus 180
 - 8.3.1 Results and Discussion 180
 - 8.3.1.1 Soil Characteristics 180
 - 8.3.1.2 EKR Experiments 182
- 8.4 Conclusions 186
 - Acknowledgments 186
 - References 186

9	Electrochemical Migration of Oil and Oil Products in Soil	191
	<i>V.A. Korolev and D.S. Nesterov</i>	
9.1	Introduction	191
9.2	Specific Nature of Soils Polluted by Oil and Its Products	192
9.3	Influence of Mineral Composition	193
9.4	Influence of Soil Dispersiveness	195
9.5	Influence of Physical Soil Properties	198
9.6	Influence of Physico-Chemical Soil Properties	201
9.7	Influence of the Initial Water/Oil Ratio in a Soil	203
9.8	Influence of the Oil Aging Process	207
9.9	Influence of Oil Composition	211
9.10	Conclusions	220
	Acknowledgments	222
	References	222
10	Nanostructured TiO₂-Based Hydrogen Evolution Reaction (HER) Electrocatalysts: A Preliminary Feasibility Study in Electrodialytic Remediation with Hydrogen Recovery	227
	<i>Antonio Rubino, Joana Almeida, Catia Magro, Pier G. Schiavi, Paula Guedes, Nazare Couto, Eduardo P. Mateus, Pietro Altimari, Maria L. Astolfi, Robertino Zanon, Alexandra B. Ribeiro, and Francesca Pagnanelli</i>	
10.1	Introduction	227
10.1.1	Electrokinetic Technologies: Electrodialytic Ex Situ Remediation	228
10.1.2	Nanostructured TiO ₂ Electrocatalysts Synthesized Through Electrochemical Methods	230
10.2	Case Study	231
10.2.1	Aim and Scope	231
10.2.2	Experimental	232
10.2.2.1	TiO ₂ Based Electrocatalyst Synthesis and Characterization	232
10.2.2.2	ED Experiments	233
10.2.3	Discussion	235
10.2.3.1	Blank Tests: Electrocatalysts Effectiveness toward HER	235
10.2.3.2	ED Remediation for Sustainable CRMs Recovery	237
10.3	Final Considerations	243
	Acknowledgments	244
	References	244
11	Hydrogen Recovery in Electrodialytic-Based Technologies Applied to Environmental Contaminated Matrices	251
	<i>Cátia Magro, Joana Almeida, Juan Manuel Paz-Garcia, Eduardo P. Mateus, and Alexandra B. Ribeiro</i>	
11.1	Scope	251
11.2	Technology Concept	253

11.2.1	Potential Secondary Resources	253
11.2.2	Electrodialytic Reactor	254
11.2.2.1	Electrodes	254
11.2.2.2	Ion-Exchange Membranes	256
11.2.2.3	PEMFC System	258
11.3	Economic Assessment of PEMFC Coupled with Electroremediation	260
11.3.1	Scenario Analysis	260
11.3.2	Hydrogen Business Model Canvas	262
11.3.3	SWOT Analysis	264
11.4	Final Remarks	265
	Acknowledgments	266
	References	266
12	Electrokinetic-Phytoremediation of Mixed Contaminants in Soil	271
	<i>Joana Dionísio, Nazaré Couto, Paula Guedes, Cristiana Gonçalves, and Alexandra B. Ribeiro</i>	
12.1	Soil Contamination	271
12.2	Phytoremediation	272
12.3	Electroremediation	274
12.3.1	EK Process Coupled with Phytoremediation	275
12.3.2	EK-Assisted Bioremediation in the Treatment of Inorganic Contaminants	277
12.3.3	EK-Assisted Bioremediation in the Treatment of Organic Contaminants	278
12.4	Case Study of EK and Electrokinetic-Assisted Phytoremediation	279
12.5	Conclusions	281
	Acknowledgments	282
	References	282
13	Enhanced Electrokinetic Techniques in Soil Remediation for Removal of Heavy Metals	287
	<i>Sadia Ilyas, Rajiv Ranjan Srivastava, Hyunjung Kim, and Humma Akram Cheema</i>	
13.1	Introduction	287
13.2	Electrokinetic Mechanism and Phenomenon	288
13.3	Limitations of the Electrokinetic Remediation Process	289
13.4	Need for Enhancement in the Electrokinetic Remediation Process	290
13.5	Enhancement Techniques	292
13.5.1	Surface Modification	292
13.6	Cation-Selective Membranes	293
13.7	Electro-Bioremediation	294
13.8	Electro-Geochemical Oxidation	295
13.9	Lasagna™ Process	296

13.10	Other Potential Processes	296
13.11	Summary	298
	Acknowledgments	299

14	Assessment of Soil Fertility and Microbial Activity by Direct Impact of an Electrokinetic Process on Chromium-Contaminated Soil	303
	<i>Prasun Kumar Chakraborty, Prem Prakash, and Brijesh Kumar Mishra</i>	
14.1	Introduction	303
14.2	Experimental Section	304
14.2.1	Soil Characteristics and Preparation of Contaminated Soil	304
14.2.2	Electrokinetic Tests, Experimental Setup, and Procedure	305
14.2.3	Testing Procedure	306
14.2.4	Extraction and Analytical Methods	306
14.2.5	Soil Nutrients	306
14.2.6	Soil Microbial Biomass Carbon Analysis	307
14.2.7	Quality Control and Quality Assurance	307
14.3	Results and Discussion	308
14.3.1	Electrokinetic Remediation of Chromium-Contaminated Soil	308
14.3.1.1	Electrical Current Changes During the Electrokinetic Experiment	308
14.3.2	pH Distribution in Soil During and After the Electrokinetic Experiment	309
14.4	Removal of Cr	310
14.4.1	The Distribution of Total Cr and Its Electroosmotic Flow During the Electrokinetic Experiment	310
14.5	Effects of the Electrokinetic Process on Some Soil Properties	312
14.5.1	Soil Organic Carbon	312
14.5.2	Soil-Available Nitrogen, Phosphorus, Potassium, and Calcium	314
14.5.3	Soil Microbial Biomass Carbon	318
14.6	Conclusion	318
	References	319
15	Management of Clay Properties Based on Electrokinetic Nanotechnology	323
	<i>D.S. Nesterov and V.A. Korolev</i>	
15.1	Introduction	323
15.2	Objects of the Study	326
15.3	Methods of the Study	328
15.4	Results and Discussion	330
15.4.1	Regulation of Soil pH	330
15.4.2	Regulation of Oxidation-Reduction Potential	332
15.4.3	Regulation of Soil Particle Surface-Charge Density	332
15.4.4	EDL Parameter Regulation	339
15.4.5	Regulation of Clay CEC	343

15.4.6	Regulation of Physico-Chemical Parameters of Soils	345
15.4.7	Regulation of Soil Texture and Structure	346
15.4.8	Regulation of Physical Clay Properties	352
15.4.9	Regulation of Soil Strength and Deformability	353
15.5	Conclusions	354
