

Сведения об официальном оппоненте

диссертации Маланчева Константина Леонидовича

«Нестационарные процессы в астрофизических аккреционных дисках»

Официальный оппонент: Блинников Сергей Иванович

Ученая степень: доктор физико-математических наук

Ученое звание: профессор

Должность: главный научный сотрудник

Место работы: Институт теоретической и экспериментальной физики

Адрес: Москва, 117218, ул. Большая Черемушкинская, 25

Тел.: +7 (495) 129-9759

E-mail: sergei.blinnikov@itep.ru

Список основных научных публикаций по специальности «Астрофизика и звездная астрономия» за последние 5 лет:

1. Light-curve modelling of superluminous supernova 2006gy: collision between supernova ejecta and a dense circumstellar medium, Moriya, T. J., et al., Monthly Notices of the Royal Astronomical Society, vol.428, p.1020, 2013
2. Type I Superluminous Supernovae as Explosions inside Non-hydrogen Circumstellar Envelopes, Sorokina, E., et al., The Astrophysical Journal, vol.829, p.17, 2016
3. The rise-time of Type II supernovae, Gonzalez-Gaitan, S., et al., Monthly Notices of the Royal Astronomical Society, vol.451, p.2212, 2015
4. Mass-loss histories of Type II supernova progenitors within decades before their explosion, Moriya, T. J., et al., Monthly Notices of the Royal Astronomical Society, vol.439, p.2917, 2014
5. Observational properties of low-redshift pair instability supernovae, Kozyreva, A., et al., Astronomy and Astrophysics, vol.565, p.A70, 2014
6. Ultra-stripped Type Ic Supernovae from Close Binary Evolution, Tauris, T. M., et al., The Astrophysical Journal, vol.778, p.L23, 2013
7. An analytic bolometric light curve model of interaction-powered supernovae and its application to Type II supernovae, Moriya, T. J., et al., Monthly Notices of the Royal Astronomical Society, vol.435, p.1520, 2013

8. Supernova Explosions of Super-asymptotic Giant Branch Stars: Multicolor Light Curves of Electron-capture Supernovae, Tominaga, N., Blinnikov, S. I., & Nomoto, K., *The Astrophysical Journal*, vol.771, p.L12, 2013
9. Synthetic light curves of shocked dense circumstellar shells, Moriya, T. J., et al., *Monthly Notices of the Royal Astronomical Society*, vol.430, p.1402, 2013
10. Coupling of matter and radiation at supernova shock breakout, Tolstov, A. G., Blinnikov, S. I., & Nadyozhin, D. K., *Monthly Notices of the Royal Astronomical Society*, vol.429, p.3181, 2013
11. Can pair-instability supernova models match the observations of superluminous supernovae?, Kozyreva, A., & Blinnikov, S., *Monthly Notices of the Royal Astronomical Society*, vol.454, p.4357, 2015
12. Electron-capture supernovae exploding within their progenitor wind, Moriya, T. J., et al., *Astronomy and Astrophysics*, vol.569, p.A57, 2014
13. Antimatter and antistars in the Universe and in the Galaxy, Blinnikov, S. I., Dolgov, A. D., & Postnov, K. A., *Physical Review D*, vol.92, p.023516, 2015
14. Rapidly Rising Transients from the Subaru Hyper Suprime-Cam Transient Survey, Tanaka, M., et al., *The Astrophysical Journal*, vol.819, p.5, 2016
15. Solving puzzles of GW150914 by primordial black holes, Blinnikov, S., et al., *Journal of Cosmology and Astro-Particle Physics*, vol.11, p.036, 2016
16. Fast evolving pair-instability supernova models: evolution, explosion, light curves, Kozyreva, A., et al., *Monthly Notices of the Royal Astronomical Society*, vol.464, p.2854, 2017
17. Stars and black holes from the very early universe, Dolgov, A. D., & Blinnikov, S. I., *Physical Review D*, vol.89, p.021301, 2014
18. How much radioactive nickel does ASASSN-15lh require?, Kozyreva, A., et al., *Monthly Notices of the Royal Astronomical Society*, vol.459, p.L21, 2016
19. Mirror matter and other dark matter models, Blinnikov, S. I., *Physics Uspekhi*, vol.57, p.183-188, 2014
20. On the nature of rapidly fading Type II supernovae, Moriya, T. J., et al., *Monthly Notices of the Royal Astronomical Society*, vol.455, p.423, 2016
21. Study of supernovae important for cosmology, Baklanov, P. V., et al., *Soviet Journal of Experimental and Theoretical Physics Letters*, vol.98, p.432, 2013
22. Direct distance measurements to SN 2009ip, Potashov, M., et al., *Monthly Notices of the Royal Astronomical Society*, vol.431, p.L98, 2013
23. Flame fronts in Type Ia supernovae and their pulsational stability, Glazyrin, S. I., Blinnikov, S. I., & Dolgov, A., *Monthly Notices of the Royal Astronomical Society*, vol.433, p.2840, 2013
24. Pulsational Pair-instability Model for Superluminous Supernova PTF12dam: Interaction and Radioactive Decay, Tolstov, A., et al., *The Astrophysical Journal*, vol.835, p.266, 2017

25. Shock Wave Structure in Astrophysical Flows with an Account of Photon Transfer, Tolstov, A., et al., The Astrophysical Journal, vol.811, p.47, 2015
26. Immediate dense circumstellar environment of supernova progenitors caused by wind acceleration: its effect on supernova light curves, Moriya, T. J., et al., Monthly Notices of the Royal Astronomical Society, vol.469, p.L108, 2017
27. Supernovae Powered by Magnetars that Transform into Black Holes, Moriya, T. J., Metzger, B. D., & Blinnikov, S. I., The Astrophysical Journal, vol.833, p.64, 2016
28. On physical and numerical instabilities arising in simulations of non-stationary radiatively cooling shocks, Badjin, D. A., et al., Monthly Notices of the Royal Astronomical Society, vol.459, p.2188, 2016
29. Multicolour modelling of SN 2013dx associated with GRB 130702A^{★}, Volnova, A. A., et al., Monthly Notices of the Royal Astronomical Society, vol.467, p.3500, 2017
30. Type Ia supernovae within dense carbon- and oxygen-rich envelopes: a model for 'Super-Chandrasekhar' explosions?, Noebauer, U. M., et al., Monthly Notices of the Royal Astronomical Society, vol.463, p.2972, 2016
31. Oxygen emission in remnants of thermonuclear supernovae as a probe for their progenitor system, Kosenko, D., et al., Monthly Notices of the Royal Astronomical Society, vol.449, p.1441, 2015
32. Thermal emission in gamma-ray burst afterglows, Badjin, D. A., Blinnikov, S. I., & Postnov, K. A., Monthly Notices of the Royal Astronomical Society, vol.432, p.2454, 2013
33. Light-curve and spectral properties of ultrastripped core-collapse supernovae leading to binary neutron stars, Moriya, T. J., et al., Monthly Notices of the Royal Astronomical Society, vol.466, p.2085, 2017
34. Multicolor Light Curve Simulations of Population III Core-Collapse Supernovae: From Shock Breakout to ⁵⁶Co Decay, Tolstov, A., et al., The Astrophysical Journal, vol.821, p.124, 2016
35. Radiation hydrodynamics of supernova shock breakouts, Blinnikov, S., et al., High Energy Density Physics, vol.9, p.17, 2013
